March 8, 2012

Secretary Ray LaHood

United States Department of Transportation,

I thought it to be a good idea to let you know Mr. Secretary, that you have Horizon Air/Alaska Airline's support for the new interchange project on Interstate 90 in Belgrade, Montana. There are so many times we have passengers from out of state (or country) who miss flights because of the difficulty getting to the airport from the existing Belgrade exit. Currently, it is poorly marked and overall, an odd way to get to an International airport. Getting this new interchange on I-90 would make the airport much more noticeable and invite traffic. It also would grant another way into Belgrade to support the growing local economy, not to mention another way around all the rail traffic.

Thank you for pushing forward with this project Mr. Secretary; and know that hundreds of thousands of people will appreciate the interchange for many years to come.

Respectfully,

Jason Boyd
